Sl: No:	Test Case Name	Test Procedure	Condition to be tested	Expected Result	Actual Result
1	Verify understanding of ML, DL, Transformers, and LLMs	Review the concepts, model types, Transformer architecture, self-attention, and LLM working principles.	Correct understanding of concepts and their relationships.	All concepts are understood and explained correctly.	Concepts studied and understanding of Transformer architecture improved.
2	Verify authenticity of financial documents	Collect and inspect annual reports, financial statements, regulatory filings, and earnings reports from official sources.	Document authenticity, completeness, and availability of financial information.	Valid financial documents are available for research and analysis.	Financial documents collected from authentic sources for analysis.
3	Verify document processing and financial data extraction	Upload a financial document, verify parsing, chunking, indexing, session management, and extraction of financial metrics.	Correct document processing, session creation, database indexing, and metric extraction.	Documents are processed successfully, sessions are managed correctly, and financial metrics are extracted accurately.	Backend components and financial extraction workflow implemented for validation.
4	Verify multi-agent financial analysis and source-grounded responses	Upload financial documents, run the agents, ask financial questions, compare company metrics, and inspect citations. Test with a non-financial document.	Red flag detection, response accuracy, citation correctness, company comparisons, agent coordination, and non-financial document detection.	Agents provide accurate, source-supported financial insights, identify relevant risks, compare metrics correctly, and flag unsupported or non-financial inputs.	Agent workflows implemented; validation performed on available financial documents. Record specific test outcomes after execution.
5	Verify PDF report generation and end-to-end workflow	Upload financial documents, execute the agents, generate a PDF report, and inspect all sections, citations, extracted metrics, and formatting.	Report completeness, PDF readability, citation accuracy, financial data correctness, agent collaboration, and retrieval reliability.	A properly formatted PDF is generated containing the Executive Summary, Key Financials, Red Flags, Company Comparison, and Outlook, with source-supported information.	Report generation and optimization activities implemented; confirm report contents and end-to-end test outcomes before marking as passed.
